

Grams Candy Crackers

Preheat Oven to 350.

Spread a single layer of crackers onto a baking sheet.

Put 1 cream drop on each cracker, and put in the oven. Bake for about 3-5 minutes... keep checking on them - they should get soft enough that you can easily press another cracker on top of them and squish it down without the cracker breaking, but not so soft that they melt in the oven.

When they're soft enough, pull them out of the oven, and quickly but gently press crackers on top and squish down until the candy meets the edge of the crackers, then let cool, and eat them all!
